COMPANY OVERVIEW

About Us

GOLD STAR INFORMATION TECHNOLOGY is a leading System Integrator. We pride ourselves to be a Total Technology Provider, offering solutions and services across:

Communication and Audiovisual
Networking, IT and Cybersecurity
Security, Safety and Automation
Digital and Development

We act as technology advisors and enablers for our customers. Recommending, designing, implementing and supporting/managing the optimal solution based on their needs, our team consists of over 50 certified and highly experienced, engineers and technicians. Our customer base, covers all verticals from public and private sectors.

OUR PROCESS

Mission & Vision

Strong, win-win, long-term partnerships are the cornerstone of today's winning organizations. **GOLD STAR INFORMATION TECHNOLOGY** vision is to mutually build strong relationships with our clients and strategic partners based on results. Through our strategic alliances we deliver turnkey solutions under our management and responsibility to ensure successful project delivery.

GOLD STAR INFORMATION TECHNOLOGY mission is resolve clients business needs. Hence, our client engagement model is focused on understanding your business challenges then delivering a TECHNOLOGY solution that addresses these challenges.

Trust, confidence, experience and expertise are all required when building and managing your most mission critical infrastructures. Many of our most successful projects have been in mission critical environments.

OUR APPROACH

ADVISE : First stage in every assignment is to understand your needs and requirements, assist you and your team in shaping your business technology strategy, and advising on potential solutions to meet it.

DESIGN : Our team of experts design the optimal solution in line with your requirements, leveraging our strategic partner's latest technology advancements to your benefit.

IMPLEMENT : Once the go-ahead is given, our seasoned project managers, site engineers and technicians go on site to install and configure your solution, with minimal disruption to your on-going operations.

SUPPORT : Based on our support agreement and SLAs, and depending on your business needs, we maintain your systems after their installation, through routine visits and on call basis.

MANAGE : Based on our support agreement and SLAs, and depending on your business needs, we maintain your systems after their installation, through routine visits and on call basis.

WHAT WE DO

Data Center

Data center works involve managing and maintaining IT infrastructure, including servers, storage, and networking equipment. Tasks include ensuring optimal performance, security, and uptime through regular monitoring, troubleshooting, and upgrades. Cooling, power management, and physical security are also critical components. Overall, it ensures reliable operation of digital services and data storage.

ICT Infrastructure

ICT infrastructure encompasses the hardware, software, networks, and services that support information and communication technology operations. It includes servers, networking devices, data centers, and communication systems essential for data transfer and connectivity. Proper management ensures reliable, secure, and efficient digital communication. It forms the backbone for organizational IT functions and digital transformation.

Security

We specialize in advanced security systems and ICT solutions, delivering smart surveillance with high-performance cameras and network technologies. Our services cover CCTV systems, access control, IT infrastructure, and integrated smart security solutions.

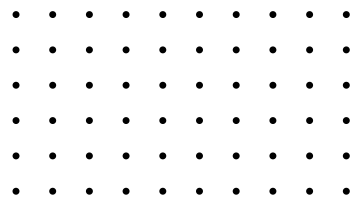

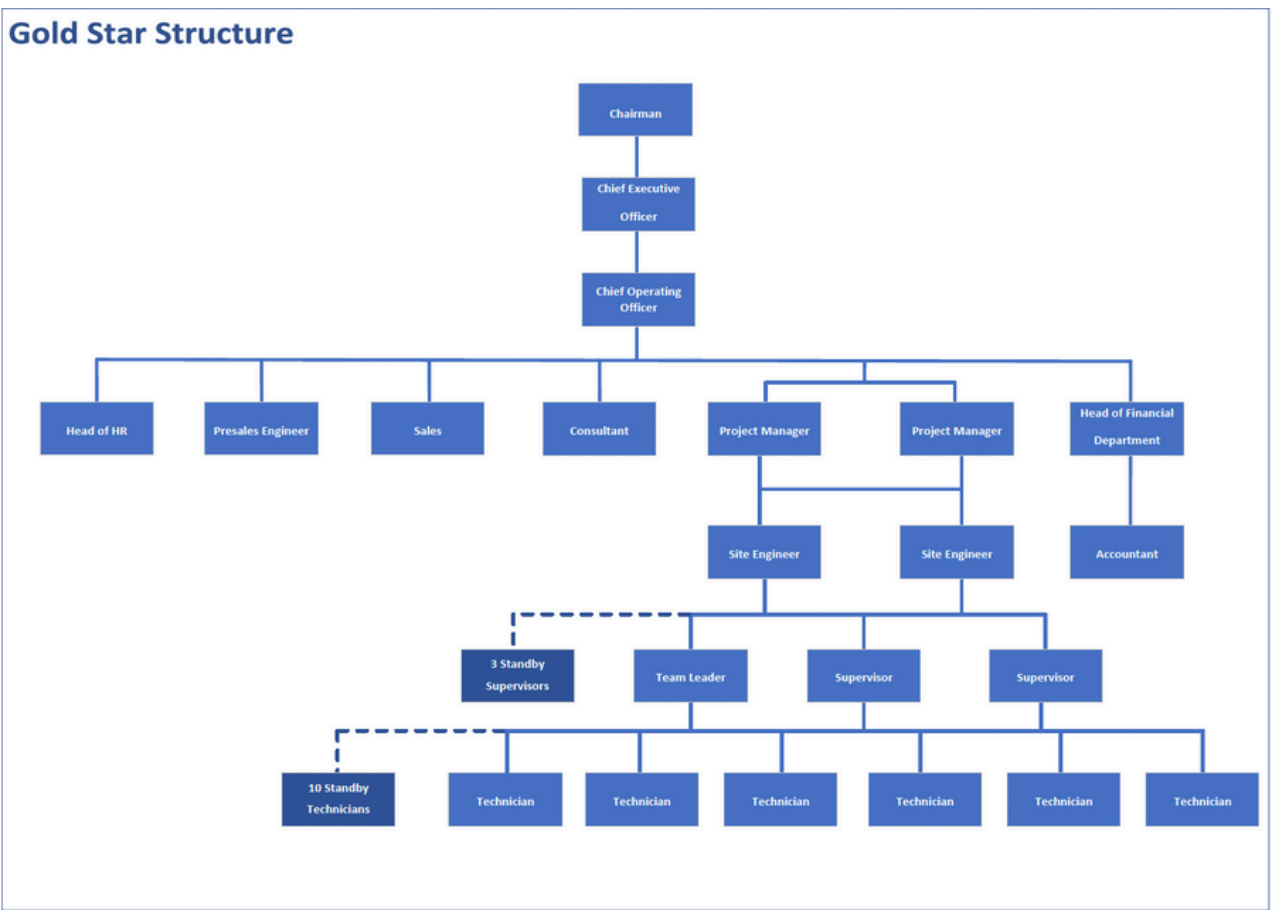

Annual Maintenance

We provide comprehensive annual maintenance contracts to ensure optimal system performance and long-term reliability. Partner with us for innovative security, seamless connectivity, and trusted ongoing support.

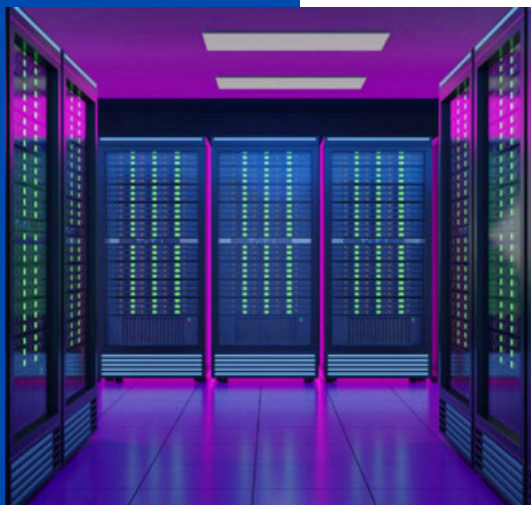

COMPANY ORGANIZATIONAL CHART

Our organizational structure is designed to support efficiency, innovation, and excellence across all areas of Information and Communication Technology (ICT). We are strategically divided into specialized departments including Management, Technical Support, Network Engineering, Security Systems, Project Management, and Customer Relations.

Each team is led by experienced professionals dedicated to delivering high-quality solutions and ensuring seamless collaboration. This structure empowers us to drive growth, maintain service excellence, and exceed client expectations across every project.
